

Government visit from Nigeria

The National Council of Climate Change (NCCC) is a Nigerian government agency that will oversee all future climate change policies in Nigeria, including renewable energy, industrial decarbonization and efficient stoves.

The first trip abroad by the Director General of this authority, Mr. Salisu Dahiru, took him to atmosfair in Berlin from February 12, 2023 to February 16, 2023. Together we discussed the planned expansion of our stove production in Nigeria, with Mr. Dahiru assuring atmosfair his full support.

atmosfair not only introduced Mr. Dahiru and his consultants to important German technology manufacturers in the field of renewable energies and green hydrogen, but also took part in meetings with various ministries, such as the Federal Ministry for Economic Affairs and Climate Protection (BMWK), the Federal Ministry for Economic Cooperation and Development (BMZ) and the Foreign Office.

And of course we visited the Brandenburg Gate and the Reichstag together.
