SECTION A.  PROJECT DESCRIPTION

A. 1. Title of the project
Title: Energy for Mam Rashan
Date: 06.09.2018
Version no.: 1.0

A. 2. Project description and current status

The aim of the project is to improve and stabilize the energy supply in the camp Mam Rashan by introducing photovoltaic energy and thereby making everyday life more bearable in the camp. At the moment the camp is only supplied with power from the public grid at night and some hours during the day. Technologies installed will include Renewable Energy Plants with Battery Systems to enable cooling and heating of the containers, charging of cell phones and the connection of electronic devices such as TVs, computers or fridges.

The project is in its implementation phase. A Local Stakeholder Consultation was carried out successfully on 18th December 2017 in Community Centre, Camp Mam Rashan, Iraq. The project framework has been developed. Start of the PV plant construction was within the second quarter of 2018.

SECTION B.  DESIGN OF STAKEHOLDER CONSULTATION PROCESS

B. 1. Design of physical meeting(s)

i. Agenda

  9:30  Arrival and signing of participant list
  9:45  Opening of the meeting, Agenda and introduction of participants
  10:00 Presentation: Who is atmosfair gGmbH?
  10:15 Project Presentation and demonstration of technology
  11:00 Time for questions
  11:30 Joint Sustainability Exercise
  13:00 - Lunch break -
  14:00 Safeguarding Principles
  14:30 Input & Grievance Mechanism
  14:45 Final Questions and Comments, Filling of Evaluation Forms
ii. Key project information

The main focus of the project is to improve and stabilize the energy supply in the camp by introducing photovoltaic energy and thereby making everyday life more bearable in the camp Mam Rashan. The realization of the project will be supported by carbon funding for which a registration under the Gold Standard is in progress. Start of the project construction was end of May 2018.

At the moment the camp is only supplied with power from the public grid at night. In a first step, atmosfair will install a 300kWp-photovoltaic system with battery storage, which will cover 20% of the total energy demand. Hence, the renewable electricity is not only helping the residents on a daily basis but also protecting the climate by reducing the usage of fossil fuels. The photovoltaic technology is a reliable and sustainable energy source. The plan is to expand the capacity of the system constantly. On the long run, the goal is to ensure a hundred percent sustainable power supply.

The power supply of the Photovoltaic Plant improves the living conditions within the camp. As it enables cooling and heating of the containers, charging of cell phones and the connection of electronic devices such as TVs, computers or fridges.

Apart from improving the livelihood of the families, the project creates jobs and training opportunities that relate to the installation and configuration of the system as well as the maintenance of the plant. Furthermore, the energy consumption will be reduced by energy-saving measures and “awareness-training sessions” for the people living in the camp. For this purpose, two “energy-scouts” are trained,
which will explain issues such as sustainability and environment protection measures to the households within the camp.

Email invitations were sent out before the Stakeholder Consultation Meeting to those people using email as a main means of communication, others were invited through direct contact. Furthermore, the meeting was announced in the camp via a public notice in local language (Kurdish) within the
community center. This method was chosen in order to access a broad range of the stakeholders. Additionally, the camp management and the relevant authorities have been visited in advance of the LSC already in May 2017.

iv. Text of individual invitations

---

**Invitation to Stakeholder Consultation Meeting**

**Name of the Project: Energy for Mam Rashan**

The project “Energy for Mam Rashan” is an initiative by the German non-profit company atmosfair gGmbH to improve and stabilize the energy supply in the camp by introducing photovoltaic energy and thereby making everyday life more bearable in the camp Mam Rashan. The project will be registered under the Gold Standard (GS) and is a contribution towards sustainable development.

The initiators would like to invite you to the Stakeholder Consultation Meeting in order to inform you about the project activity and the technology. The goal of this meeting is to discuss with local stakeholders all aspects of the project with clear focus on sustainability indicators and climate protection.

In order to receive feedback from you on these issues and to hear valuable suggestions and concerns, a Stakeholder Consultation Meeting is organized on

**Monday, December 18th 2017, 11:00 am – 6:00 pm**

Community Centre, Camp Mam Rashan, Iraq

**Agenda of the Consultation:**

- Opening of the meeting
- Introduction of the project
- Questions for clarification about the project
- Blind Sustainable Development exercise
- Discussion on monitoring Sustainable Development
- Closure of the meeting and filling of evaluation form
We would greatly appreciate your presence (or of your representative) and active participation, to make the meeting a successful one. Kindly accept our invitation to attend and guide us in the meeting.

Please fill in the reply form enclosed and send it to us via email latest by December 16th, to help us arrange logistics. Snacks and refreshment will be provided.

If you are unable to participate, please feel free to comment on the Key Project Information enclosed. Contact details are provided below.

v. Text of public invitations (in Arabic)

المصلحة أصحاب ان التشاور اجتماع

رشان مام لمجمع الكهربائية الطاقة: المشروع اسم
مشروع الطاقة الكهربائية لمجمع مام رشان هو مبادرة من شركة المانية غير مربحة اتموسفير لتحسين و توطيد الطاقة الكهربائية في المجمع من خلال بناء مشروع الطاقة الشمسية و ذلك لتحسين الحياة اليومية في المجمع. سيسجل المشروع في كولد ستاندرد (Gold Standard. كمساهمة لإعادة التنمية.

يدعو المبادرون بهذا المشروع يدعوكم لحضور اجتماع التشاور مع أصحاب المصلحة و إبلاغكم بنشاطات المشروع و ك 말씀ه بهويته. الهدف من الاجتماع هو مع أصحاب المصلحة المحليين حول تفاصيل المشروع و وبالأخص التركيز على مؤشرات الاستدامة و حماية البيئة.

و لغرض الحصول على ردودكم حول هذه الأمور، و الاستماع لارائكم و اهتماماتكم القيمة، تم تنظيم اجتماع التشاور مع أصحاب المصلحة يوم الاثنين المصادف 18/12/2017 من الساعة 11:00 صباحا إلى الساعة 6:00 مساءً
في قاعة المركز الاجتماعي في مجمغ مام رشان.

جدول أعمال الاجتماع
افتتاح الاجتماع
- مقدمة من المشروع
- أسئلة لتوضيح حول المشروع
- تمرين التنمية المستدامة
- مناقشة حول مراقبة التنمية المستدامة
- اختتام الاجتماع وملء استمارة التقييم

نحن نقدر تقديركم الكبير حضوركم (أو ممثلكم) ومشاركتكم النشطة، لجعل الاجتماع ناجحاً. يرجى قبول دعوتنا لحضور ومشاركتنا في الاجتماع.

يرجى ملء نموذج الرد المرفق وإرساله إلينا عبر البريد الإلكتروني في موعد أقصاه 16 ديسمبر لمساعدتنا في ترتيب الخدمات اللوجستية. وسيتم توفير الوجبات الخفيفة والمرطبات.

إذا كنت غير قادر على المشاركة، فلا تتردد في التعليق على معلومات المشروع الرئيسية المرفقة. يتم توفير تفاصيل الاتصال أدناه.

B. 2. Description of other consultation methods used

Individuals/entities that were not able to attend the physical meeting were asked in the email invitations to comment on the provided Key Project Information that was sent out along with the invitation letter.

The Stakeholder Consultation Report will be uploaded to the atmosfair website, where it will be publicly accessible. Attendees of the physical meeting as well as stakeholders who could not attend the meeting (e.g., GS NGO supporters) will be informed via email. Local stakeholders without email access will have access to a hard copy of the report and will be asked for their comments.

SECTION C. CONSULTATION PROCESS

C. 1. Participants’ in physical meeting(s)

i. List of participants

The original participant’s list is attached in Annex 1.
## ii. Evaluation forms

<table>
<thead>
<tr>
<th>Name</th>
<th>Hassan Jousif</th>
</tr>
</thead>
<tbody>
<tr>
<td>What is your impression of the meeting?</td>
<td>Good start for the Idea of Renewable Energy in our country.</td>

C. 2. Pictures of physical meeting(s)

C. 3. Outcome of consultation process

i. Minutes of physical meeting(s)

Welcoming remarks and presentation of participants:
The meeting was opened by Hoshyar Rassam and Shero Smo followed by the introduction of
the agenda and themselves. Everyone was asked to introduced him/herself and state the expectations of this meeting.

**Expectations of the meeting:**

The expectations of the meeting were mainly learning about the project and to understand the technology and the benefit for the camp. Some of the participants wanted to know how they can be involved in the project. The members of the ministry were interested to discuss the process of the installation and operation and maintenance.

**Project Presentation:**

The expectations were followed by introducing the project and the purpose of the meeting and the project. Hosyhar Rassam introduced atmosfair gGmbH, by mentioning its core values and explaining the key facts about the company.

Hosyhar Rassam described the framework of the Gold Standard and explained that it needs to be able to track the emission reduction under the project.

The project was described and the used technology was explained. Main focus was given on the involvement of the camp residents within the plant installation and operation. Main concern of the attendees was the undersupply of the camp through the plant, as just around 20% of the energy demand can be covered by the first stage of the project. It was explained and discussed how a fair distribution of the limited produced energy can be achieved and that the increase of the total capacity will be the aim for the next years.

**Questions:**

Q: How will you ensure a fair supply of energy, if not enough energy for all at once will be produced?
A: We will install an energy management system that automatically controls the loads. In the system, an equal supply for all load groups will be programmed feeding one load group after another. In the case, that the supply distribution shall be changed, the schedule can be modified in the program.

Q: How will you guarantee a stable operation of the energy plant long term?
A: The plant will be handed over to the camp management after a successful installation. For the operation and maintenance of the plant, we will train a certain team responsible for that. Furthermore, we will supervise the plant for the first year of operation.

Q: What happens when the national grid is available?
A: At the time the national grid is available, the camp will be supplied by the national grid. The PV plant will be used to load the batteries and will be switched off afterword's.

Q: Do you plan to extend the plant capacity?
A: Yes, we hope to be able to extend the plant capacity, but this depends on the negotiations with the donors of our project. At the time being, we can’t promise anything.

Q: How will you include the directory in the planning?
A: For the project development, we worked together with the camp management and had meetings with the ministry of electricity. In this early project stage, we tried to include all
stakeholders as much as possible but the project budget and the availability of donated equipment also needs to be considered. The detailed project implementation will be discussed with the authorities.

Sustainable Development Goals

The SDGs were read in English and translated to Kurdish. Discussions and results in Kurdish were translated to English and written down (for results refer to D.2.ii.). Hoshyar Rassam explained the SDGs and the project impact on them were discussed. In general, the participants pointed out, that the SDGs are from minor interest for them in their current situation as refugees. They need an improvement of their situation through a stable access to energy. As a result, they could not see any negative impact on the SDGs as long as the energy is distributed equally between the households.

Safeguarding principles

Hosyhar Rassam explained the safeguarding principles, which are foreseen in the project standard falls and described those. A risk was not seen for any of the safeguarding principles regarding the project implementation.

Grievance mechanism

The grievance mechanism of the project got explained and Hosyhar Rassam described how the customer can comment on and complain about the project. It was agreed, that the mechanism, which the project will apply, is using grievance forms and grievance books. The email contact of the camp management, atmosfair and Gold Standard, were given to the stakeholders and they were told, that they could also show up in person at the office of the camp manager.

ii. Minutes of other consultations

Outcome of the meeting with the governor of Dohuk on the 24th of May 2017, is a Letter of Intent signed on the 5th of October 2017. The intention of the parties agreed on were the following:

- atmosfair aims to install a Photovoltaic plant in combination with a battery system as a back-up. The plant would be installed in the center of the camp and connected to the grid. Therefore, the network infrastructure of the camp would be used. After plant commissioning, the plant is aimed to be handed over to B.R.H.A. B.R.H.A would be responsible for a successful operation and maintenance of the plant. As a support, atmosfair intends to train IDPs and staff from the camp in the maintenance of the plant.

In the course of this process:

- atmosfair strives to source for financial funding
- atmosfair pursues the engineering, procurement and construction partly with subcontractors
- atmosfair intends to do the installment and maintenance training
- atmosfair strives to conduct an energy efficiency training for the IDPs within the camp
- atmosfair intends to register the project under the Gold Standard
- B.R.H.A intends to provide the space for the plant within the camp
- B.R.H.A intends to provide access to the camp for atmosfair and its sub-contractor
- B.R.H.A intends to provide access to required camp information and the camp management
- B.R.H.A is expected to be responsible for the operation and maintenance of the plant

iii. Assessment of all comments

<table>
<thead>
<tr>
<th>Stakeholder comment</th>
<th>Was comment taken into account (Yes/ No)?</th>
<th>Explanation (Why? How?)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Capacity of the project too low for the demand within the camp</td>
<td>Yes</td>
<td>We explained that this is the capacity possible to be provided within the budget for the first project phase. We are intending to constantly increase the capacity as soon as more funding is available.</td>
</tr>
<tr>
<td>Concerns that the capacity shortage leads to an inequality within the camp</td>
<td>Yes</td>
<td>The energy management system will use an algorithm to distribute the energy equal within the camp. Each container group will have access to the energy for a defined time. The energy supply will be managed in a rotating system.</td>
</tr>
<tr>
<td>The project is good but will not cover all the camp</td>
<td>No</td>
<td>The integration of the shops, offices and public facilities will be part of a project extension after the demand of the households is covered. It is not possible with the current...</td>
</tr>
</tbody>
</table>
iv. **Revisit sustainability assessment**

Are you going to revisit the SDG and safeguards assessment?  

<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>X</td>
</tr>
</tbody>
</table>

Please note that this is necessary when there are differences between your own assessment and feedback collected during stakeholder consultation.

Stakeholders did not think that any of the indicators will be negatively impacted by the project. No comments were given, that have an influence on the SDG and safeguards assessment.

v. **Summary of alterations based on comments**

The biggest concern is the limited capacity of the installed PV plant within the first stage of the project. To avoid any disadvantages in the access to the electricity, the electricity will be equally shared between the households. Each container has access to the electricity for a certain time period per day and the time slots are rotating.
D. 1. Own sustainable development assessment

i. Safeguard assessment

<th>N/A</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 - Climate and Energy Energy Supply</td>
<td>b) Will the Project use energy from a local grid or power supply (i.e., not connected to a national or regional grid) or fuel resource (such as wood, biomass) that provides for other local users?</td>
<td>No</td>
<td>The project will generate energy and not consume energy.</td>
<td>N/A</td>
</tr>
</tbody>
</table>

### ii. Sustainable Development Goals (SDG) outcome

The below table shows the results from the Blind SDG Assessment conducted during the Local Stakeholder Meeting:

<table>
<thead>
<tr>
<th>SDG</th>
<th>Positive/Negative/Neutral</th>
<th>Justification given by Stakeholders</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 - No poverty</td>
<td>Positive</td>
<td>Through the increase of electricity supply within the camp, the households are depending less on diesel generators and are saving money.</td>
</tr>
<tr>
<td>2 - Zero hunger</td>
<td>Neutral</td>
<td>Project has no direct impact on this SDG</td>
</tr>
<tr>
<td>3 - Good health and well being</td>
<td>Positive</td>
<td>Less use of diesel generators and better cooling options in summer.</td>
</tr>
<tr>
<td>4 - Quality education</td>
<td>Positive</td>
<td>With electricity for cooling, the kids have a better environment for learning.</td>
</tr>
<tr>
<td>SDG</td>
<td>Rating</td>
<td>Justification</td>
</tr>
<tr>
<td>----------------------------</td>
<td>----------</td>
<td>---------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>5 - Gender</td>
<td>Positive</td>
<td>The stakeholders rated it positive without giving a justification.</td>
</tr>
<tr>
<td>6 - Clean water and sanitation</td>
<td>Positive</td>
<td>The water pumps might work better with the improved access to electricity.</td>
</tr>
<tr>
<td>7 - Affordable and clean energy</td>
<td>Positive</td>
<td>The project produces clean energy that will be available for free.</td>
</tr>
<tr>
<td>8 - Decent work and economic growth</td>
<td>Positive</td>
<td>The project will generate jobs within the camp.</td>
</tr>
<tr>
<td>9 - Industry, innovation and infrastructure</td>
<td>Neutral</td>
<td>Project has no direct impact on this SDG</td>
</tr>
<tr>
<td>10 - Reduced inequalities</td>
<td>Positive</td>
<td>If all families are getting access to the electricity it reduces the inequality between the families that can afford an extra diesel generator and those who cannot.</td>
</tr>
<tr>
<td>11 - Sustainable cities and communities</td>
<td>Neutral</td>
<td>Project has no direct impact on this SDG</td>
</tr>
<tr>
<td>12 - Responsible consumption and production</td>
<td>Positive</td>
<td>Part of the project is a training of the households in an efficient energy use.</td>
</tr>
<tr>
<td>13 - Climate action</td>
<td>Positive</td>
<td>The project reduces CO2 emissions.</td>
</tr>
<tr>
<td>14 - Life below water</td>
<td>Neutral</td>
<td>The stakeholders rated it positive without giving a justification.</td>
</tr>
<tr>
<td>15 - Life on land</td>
<td>Neutral</td>
<td>The stakeholders rated it positive without giving a justification.</td>
</tr>
<tr>
<td>16 - Peace justice and strong institutions</td>
<td>Positive</td>
<td>The stakeholders rated it positive without giving a justification.</td>
</tr>
<tr>
<td>17 - Partnership for the goals</td>
<td>Positive</td>
<td>Different partners are working together on the project. Partnership of commercial private sector, NGO, Gov., local and international.</td>
</tr>
</tbody>
</table>

Comparing the own sustainable development assessment (D.1.) with the one resulting from the blind exercise conducted with stakeholders (D.2.), it can be seen that all SDGs considered positive in D.1. were also assessed positive in D.2. During the stakeholder meeting, more SDGs were ranked positive than in the own assessment, where some of those were ranked neutral. While the positive aspects of the project regarding these SDGs were also recognized during the own assessment, the final neutral rating was given because either the project does not address the specific targets that fall under the respective SDG (e.g. SDG 10, SDG11) or the significance of the positive effect cannot be assessed and proved within the frame of the project (e.g. SDG 3, SDG 4). More detailed justifications can be found in table under D.1.ii.
E. 1. Discussion on Sustainability monitoring Plan

The following ideas for monitoring sustainable development indicators were given by the stakeholders during the Local Stakeholder Consultation.

<table>
<thead>
<tr>
<th>SDG</th>
<th>Monitoring ideas from stakeholders</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 - No poverty</td>
<td>Asking the households if they saved money.</td>
</tr>
<tr>
<td>2 - Zero hunger</td>
<td>N/A</td>
</tr>
<tr>
<td>3 - Good health and well being</td>
<td>Asking the households if they are seeing an improvement in health and well-being.</td>
</tr>
<tr>
<td>4 - Quality education</td>
<td>N/A</td>
</tr>
<tr>
<td>5 - Gender</td>
<td>N/A</td>
</tr>
<tr>
<td>6 - Clean water and sanitation</td>
<td>N/A</td>
</tr>
<tr>
<td>7 - Affordable and clean energy</td>
<td>Amount of households having access to the electricity.</td>
</tr>
<tr>
<td>8 - Decent work and economic growth</td>
<td>Amount of people employed through the project.</td>
</tr>
<tr>
<td>9 - Industry, innovation and infrastructure</td>
<td>N/A</td>
</tr>
<tr>
<td>10 - Reduced inequalities</td>
<td>Check if all containers within the camp have access to the electricity</td>
</tr>
<tr>
<td>11 - Sustainable cities and communities</td>
<td>N/A</td>
</tr>
<tr>
<td>12 - Responsible consumption and production</td>
<td>Amount of households trained in an efficient energy use.</td>
</tr>
<tr>
<td>13 - Climate action</td>
<td>Amount of reduced CO2 emissions</td>
</tr>
<tr>
<td>14 - Life below water</td>
<td>N/A</td>
</tr>
<tr>
<td>15 - Life on land</td>
<td>N/A</td>
</tr>
<tr>
<td>16 - Peace justice and strong institutions</td>
<td>N/A</td>
</tr>
<tr>
<td>17 - Partnership for the goals</td>
<td>N/A</td>
</tr>
</tbody>
</table>

For SDG1, stakeholders suggest that money savings on diesel could be assessed during the monitoring. However, this will be not the same for all households and will be difficult to assess, therefore the SDG was set neutral.
SDG3 could be monitored just by questions about the individual feelings of the electricity users. As the well-being is influenced by many factors the results will be not significant, therefore the SDG was set neutral.

For SGD 8, the ideas were more focused on the end-users, who might also have income generating possibilities by using the solar devices (e.g. offering battery/phone charging in small shops). As the focus of the project is on private households, these positive effects might not be significant. However, the direct positive effect the project has on SDG8 is the job and income generation in project activities including sales/distribution of solar devices, conduction of user trainings, maintenance and repair of devices and administration. The monitoring could involve the procurement of staff lists as well payrolls/pay slips of local people employed within the project.

For SDG 13, the stakeholders had a clear idea (Calculation of annual CO2 savings) which is very much in line with the planned monitoring approach.

It became also clear during the exercise, that the positive effect of some SDGs is difficult to monitor.

### E. 2. Discussion on continuous input / grievance mechanism

<table>

<td>-</td>
</tr>
</tbody>
</table>

**SECTION F. DESCRIPTION OF THE DESIGN OF THE STAKEHOLDER FEEDBACK ROUND**

The Stakeholder Consultation Report will be uploaded to the atmosfair website, where it will be publicly accessible. Attendees of the physical meeting as well as stakeholders who could not attend the meeting (e.g., GS NGO supporters) will be informed via email. Local stakeholder without email access will have access to a hard copy of the report and will be asked for their comments.

**What is your impression of the meeting?**

اهمته كان بإمكانه في جميع نقاطها
كانت ممتعة

**What do you like about the project?**

انا متمسك براحم ورؤية وقادة بل بيئة رائعة.
توفرها القيادة تعرف جاهد المبتكرين

**What do you not like about the project?**
