

Project News

Project supported by Grüner Strom Label e. V.

Since the beginning of November and for the next two years, our biogas project in Nairobi River Basin in Kenya once more receives generous support by Grüner Strom Label e. V.. The funding of 20,000 EUR will help 200 dairy-farmers to get their own biogas digesters. We will use the funding to lower the investment costs for biogas units beyond the support already provided by atmosfair, so that more people can afford cooking with clean biogas.
